Center for Urban
Population Health

Working together to improve the health of communities

This report was prepared by the Design, Analysis and Evaluation team at the Center for Urban Population Health. Jessica Rice, MPH and Melissa Lemke, MA prepared this report. If there are any questions, please feel free to contact them at 414.219.5100.

The funding to prepare this report comes from Aurora Health Care, Columbia St. Mary's, Children's Hospital of Wisconsin, Froedtert & the Medical College of Wisconsin, ProHealth Care and Wheaton Franciscan Healthcare Inc.

Table of Contents

Total Population	1
Demographics	2
Total Births	3
Percent Births Receiving First Trimester Care	4
Percent Late or No Prenatal Care	5
Tobacco Use During Pregnancy	6
Low Birth Weight	7
Infant Mortality	8
Premature Birth	9
Birth Rate Ages 15-19	10
Birth Rate Ages 15-17	11
Number of Deaths and Mortality Rate	12
Years of Potential Life Lost	13
Age-Adjusted Mortality Rate	14
Average Age at Death	15
Number and Rate of Injury Deaths	16
Number and Rate of Suicides	17
Number and Rate of Injury Hospitalizations	18
Number and Rate of Emergency Room Visits for Injuries	19
Sexually Transmitted Infections	20
HIV	21
Cancer Incidence	22
Health Behaviors from Behavioral Risk Factors Surveillance Survey	23

Notes:

In the spring of 2012, the Center for Urban Population Health was enlisted to create reports detailing the health of various counties using secondary data. These health data reports are one piece of a variety of data sources being used by six local health systems to describe their communities and the health priorities of their service areas. These reports were specifically developed to compliment a telephone survey being done in each county. Because of their complimentary nature, these reports are not all-inclusive. Indicators for which primary data are being collected were excluded from this report. In addition, rather than repurposing data from the comprehensive county rankings report created by the University of Wisconsin Population Health Institute (2012), the county level data from the rankings report is included in its entirety at the end of this report.

All of the data used in this report come from publicly available data sources. Data for each indicator was presented by race and ethnicity and gender when the data were available. In some cases data were not presented by the system from which it was pulled due to their internal confidentiality policies which specify that data will not be released when the number is less than five. In other cases, the data were available but the rates or percentages are not presented in this report. This is due to the indicator having small numbers in the numerator or denominator resulting in rates or percentages that were subject to large year to year fluctuations and, as such, would not have provided a meaningful representation of the data for the population subset.

When applicable, Healthy People 2020 objectives are indicated for each indicator. These objectives were not included unless the indicator directly matched with a Healthy People 2020 objective.

University of Wisconsin Population Health Institute. *County Health Rankings 2012*. Accessible at www.countyhealthrankings.org.
